ABOUT US

Our company, established in 1992, is engaged in wholesale and retail sales of automotive exhaust systems accessories.

In addition, our network of auto repair workshops across Lithuania provides repair and maintenance services for cars, buses, motorcycles, and other machinery.

Due to increasing demand and rising prices for exhaust system accessories, we made the decision to expand our operations and began manufacturing a range of components in-house.

By the year 2000, we had expanded our production and warehouse space to 3,000 m².

In recent years, we have regularly participated in international automotive exhibitions such as „Automechanika Frankfurt“, „Warsaw Motor Show“, and others.

We specialize in manufacturing products from aluminized and stainless steel pipes, such as:

- Universal connectors,
- Flanges,
- Straight, curved and perforated pipes

and other components required for the repair of exhaust systems for all types of vehicles.

We are also one of the largest suppliers of flexible pipes in Europe, produced in India and China.

Our products have earned recognition in many Baltic and European countries, including Poland, Germany, Slovenia, Bulgaria, and others.

Thanks to our cooperation with reliable logistics partners, we ensure fast and secure delivery.

One of our key advantages is the availability of over 50,000 units of flexible connectors in stock in Lithuania, sourced from leading manufacturers in China and India. This allows us to work closely with major exhaust system manufacturers from Poland, Slovenia, and other European countries who use our components in their production.

Attached, you will find our latest product catalog, which includes:

- Flexible exhaust pipes,
 - Ceramic and metal catalytic converters,
 - Accessories for the repair and manufacturing of exhaust systems,
- and much more.

We would be happy to discuss potential cooperation and answer any questions you may have.

If you are interested in our products or have ideas for collaboration, let us know, and we will prepare a personalized offer.
